

PRATHAP S

Cloud & DevOps Engineer

Phone No: +91 6380353181

Email ID: prathapece1234@gmail.com

Relevant & Total Experience: 5 years

Tiruvannamalai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Engineer with 5+ years of experience designing, automating, and operating enterprise cloud platforms across AWS, GCP, and private cloud environments. Experienced in Kubernetes platform engineering, GitOps, Infrastructure as Code (Terraform), CI/CD automation, DevSecOps, Amazon EKS operations, cluster lifecycle management, observability, disaster recovery, cloud migrations, and cost optimization. Proven ability to deliver highly available, scalable, secure, and production-ready cloud infrastructure while improving operational efficiency through automation and SRE best practices.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, VPC, IAM, RDS, CloudWatch, Route53, CloudTrail, SNS, SES, WAF, CloudFront, EBS, EFS, ECR, SSM, AWS Backup), GCP (Compute Engine, IAM, VPC, Cloud Storage, Cloud Armor, Cloud DNS, Backup & DR)

IaC & Automation: Terraform, Ansible, CloudFormation, Bash/Shell Scripting, Cron Jobs, Ansible Playbooks, Terraform Modules

Containers & Kubernetes: Docker, Kubernetes, Amazon EKS, Kustomize, Helm, RBAC, Ingress Controllers, Horizontal Pod Autoscaler (HPA), Cluster Autoscaler, Karpenter, Argo Rollouts, Namespace Management, Node constraint management

CI/CD & GitOps: GitHub Actions, Jenkins, Argo CD, Git, GitHub, Bitbucket, GitOps

Observability & SRE: Prometheus, Grafana, Amazon CloudWatch, AWS CloudTrail, OTEL, AWS X-Ray, Google Cloud Monitoring, Google Cloud Logging, Google Cloud Trace, OpsRamp

Security & DevSecOps: IAM, IAM Governance, MFA, AWS KMS, Google Cloud KMS, AWS Secrets Manager, SSL/TLS, SSH Hardening, Kubernetes RBAC, Security Groups, Network Policies, AWS WAF, SELinux, auditd, AWS CloudTrail, Google Cloud Audit Logs

Virtualisation: VMware vSphere, Virtuozzo (OpenStack-based), Proxmox VE - PoC to production lifecycle

Migration Tools: Carbonite Migrate, GCP Migrate to VMs, vCenter vMotion

Databases: PostgreSQL, Oracle, AWS RDS - provisioning, backup, parameter tuning

Networking: VPC, Load Balancers, DNS, TCP/IP, Firewalls, NFS, VPN, NAT, IPAM

OS & Linux Admin: RHEL, Ubuntu, CentOS, Amazon Linux, Windows Server - LVM, kernel tuning (sysctl), User/group management, package management, performance optimisation

Backup & Storage: AWS Backup, GCP Backup & DR, Veeam, EBS, EFS, S3, Google Persistent Disk, Filestore, SAN, iSCSI, Velero (k8s backup).

PROFESSIONAL EXPERIENCE

Cloud Engineer & Linux System Administrator | XIUS CORP Pvt Ltd | Hyderabad | Dec 2024 - Present

- Architect and maintain high-availability AWS multi-account environments (AWS Organizations, EC2, VPC, IAM, CloudWatch, AWS Backup), sustaining 99.9% production uptime and meeting enterprise SLAs.
- Led end-to-end VMware vSphere to GCP migration - dependency analysis, network re-architecture, production cutover, and post-migration validation - achieving zero data loss and minimal downtime.
- Deployed and manage secure GCP infrastructure (Compute Engine, VPC, Cloud Storage, IAM, Cloud DNS, Backup & DR) to host migrated enterprise workloads.
- Owned Proxmox VE full lifecycle: bare-metal installation, cluster design, HA, storage/networking, VM provisioning, and telecom IMS workload validation - from PoC through production go-live.
- Deployed and managed Virtuozzo (OpenStack-based) private cloud: VM provisioning, tenant management, resource allocation, networking, and platform availability for 100+ VMs.
- Accelerated application delivery using Jenkins, GitHub Actions, Terraform, and Ansible by building and maintaining CI/CD pipelines for automated build, test, deployment, and infrastructure provisioning, reducing deployment time by 70% and enforcing Infrastructure as Code (IaC) best practices.

- Managed Amazon EKS clusters end-to-end: Helm deployments, node scaling, RBAC, ingress controllers, and cluster security troubleshooting - supporting containerised application hosting.
- Implemented GitOps using Argo CD, Helm, ApplicationSets, and Progressive Canary Deployments with Argo Rollouts for automated Kubernetes application delivery.
- Performed Amazon EKS control plane upgrades, managed node group upgrades, Kubernetes add-on lifecycle management, Helm upgrades/rollbacks, and cluster maintenance with minimal production downtime.
- Implemented Kubernetes autoscaling using Horizontal Pod Autoscaler (HPA) and Karpenter to dynamically scale application workloads and worker nodes based on production demand.
- Built production observability using Prometheus, Grafana, Alertmanager, Amazon CloudWatch, and OpsRamp with health monitoring, alerting, infrastructure dashboards, and performance analysis.
- Strengthened DevSecOps posture via IAM governance, MFA, SSL/TLS lifecycle management, secrets management, SSH hardening, and least-privilege access controls across AWS and GCP.
- Automated server provisioning, configuration management, patching, and health monitoring with Bash/Shell scripting, aws patchmanager and Ansible Playbooks, cutting manual effort by over 60%.
- Administered enterprise Linux servers (RHEL, Ubuntu): systemd, kernel tuning (sysctl), LVM, filesystem management, SELinux, auditd, log rotation, cron jobs, and performance optimisation.
- Managed operating system patching using AWS Systems Manager Patch Manager by defining patch baselines, maintenance windows, compliance reporting, and automated patch deployment for Linux/windows servers.
- Managed production Linux (RHEL, Ubuntu) and Windows Server environments, troubleshooting critical incidents, performance issues, and service outages while ensuring high availability and SLA compliance.
- Led incident response, root cause analysis (RCA), and disaster recovery planning for production infrastructure, ensuring business continuity in line with Recovery Time and Point Objectives.

Cloud Engineer | Plintron Mobility Solutions Pvt Ltd | Chennai | Jul 2021 - Dec 2024

- Sustained 99.9% SLA compliance for AWS-hosted telecom BSS/OSS platforms (billing, mediation, charging) serving multiple MVNO clients.
- Designed secure, multi-tenant AWS environments using IAM policies, VPC segmentation, Route 53, Security Groups, and KMS encryption - enforcing strict data isolation between clients.
- Reduced operational overhead by roughly 65% through IaC (Terraform), Ansible automation, and scripting; drove Infrastructure as Code adoption across all project workstreams.
- Configured and managed 3-tier production architectures (Nginx, Tomcat, Oracle, PostgreSQL) supporting high-availability billing and mediation services.
- Administered Linux production servers (RHEL, CentOS, Ubuntu): package management, systemd, user administration, NFS mounts, firewall management, and server hardening (SSH, sudo policies, auditd).
- Enforced compliance and auditability through auditd, rsyslog, logrotate, and CloudTrail - maintaining regulatory-grade audit trails across all production environments.
- Streamlined deployment and infrastructure efficiency through Docker containerization and standardized cloud operations.
- Configured and maintained Jenkins CI/CD pipelines integrated with Git, Docker, and Terraform for automated application deployments, infrastructure provisioning, and release management across production environments.
- Monitored AWS cloud costs and resource utilization using AWS Cost Explorer and CloudWatch while supporting capacity planning and infrastructure optimization. Managed database backup governance for Oracle and PostgreSQL billing databases, ensuring point-in-time recovery capability and meeting RPO/RTO targets.
- Led critical incident recovery for production BSS/OSS systems - RCA, corrective action, and post-incident documentation aligned with enterprise change management processes.

KEY PROJECTS

TuneTalk & Newco - BSS/OSS Cloud Platform on AWS

- Designed and maintained AWS multi-account infrastructure hosting BSS/OSS platforms (billing, mediation, charging) for two MVNO clients, using VPC, Amazon EKS, EC2, ALB, CloudFront, IAM, and Route 53.
- Enforced multi-tenant data isolation via VPC segmentation, IAM boundary policies, KMS encryption, WAF, and CloudFront - with independent audit trails per account.
- Built CI/CD pipelines using Jenkins, GitHub Actions, and Argo CD, enabling automated build, testing, container image creation, and zero-downtime deployments with automated rollback support.
- Managed Amazon EKS clusters hosting containerised BSS/OSS microservices: Helm deployments, RBAC, ingress, node auto-scaling, and security patching to sustain SLA targets.

- Implemented Argo Rollouts for progressive Canary deployments integrated with GitHub Actions and Argo CD.
- Configured Horizontal Pod Autoscaler (HPA) and Karpenter for automated pod and node scaling in production Kubernetes clusters.
- Implemented full observability (Prometheus, Grafana, CloudWatch): SLO/SLA tracking, distributed tracing, log aggregation, audit logging, and exception tracking dashboards.
- Automated all infrastructure provisioning via Terraform modules and Ansible playbooks, reducing deployment lead time by more than half with consistent, auditable environment management.

Freedom - Virtuozzo Private Cloud Platform

- Provisioned and administered 100+ Linux virtual machines on a large-scale Virtuozzo (OpenStack-based) private cloud, managing tenant isolation, resource quotas, storage, and networking.
- Automated VM provisioning, configuration management, patching, and decommissioning tasks using Ansible Playbooks, Shell scripting, and infrastructure APIs, improving operational efficiency and consistency.
- Managed Oracle Database and PostgreSQL instances: storage provisioning, backup schedules, parameter tuning, and service availability - aligned with enterprise RTO/RPO requirements.
- Integrated API-based monitoring with OpsRamp for real-time health checks, application metrics, and alerting; maintained platform availability with documented incident response procedures.

VMware to GCP Cloud Migration

- Led the migration of VMware vSphere workloads from Equinix Metal (EOL data centre) to Google Cloud Platform, designing the target cloud architecture and network topology from scratch.
- Conducted workload dependency analysis, capacity planning, and migration scheduling to minimise production downtime; performed vMotion relocations between ESXi hosts to stage workloads pre-cutover.
- Executed production cutovers using Google Cloud Migrate to VMs, ensuring zero data loss; validated all migrated services against defined acceptance criteria before go-live sign-off.
- Implemented IaC (Terraform) to provision GCP Compute Engine, VPC, Cloud DNS, Cloud Armor, IAM, and Backup & DR services, making the migrated environment fully reproducible and auditable.
- Established post-migration observability using Prometheus, Grafana, and GCP Cloud Monitor - covering distributed tracing, log aggregation, application metrics, and automated health-check APIs.
- Produced migration runbooks, architecture diagrams, and knowledge-transfer documentation for operations and business continuity teams.

Lycamobile

- Managed AWS production servers for Lycamobile's BSS/OSS platform - IAM least-privilege policies, KMS encryption, network segmentation, and security group governance across multi-account environments.
- Implemented compliance and audit controls (auditd, CloudTrail, rsyslog) to maintain immutable audit logs across all production environments, supporting regulatory and internal compliance requirements.
- Hardened Linux servers hosting billing and mediation services through SSH key management, sudo policies, SELinux enforcement, and regular compliance reviews.
- Performed proactive performance monitoring and production troubleshooting for billing-critical services, resolving incidents rapidly to prevent service or data loss.

AWARDS & RECOGNITION

- Management Appreciation - independently delivered critical infrastructure projects on time with strong ownership and self-driven execution under tight deadlines.
- Star Performer - recognised for consistent excellence in cloud operations and devops, automation, and production support, reflecting sustained impact across all project deliverables.

EDUCATION

B.E. Electronics & Communication Engineering

Anna University, Tindivanam, Tamil Nadu - (2016-2020)

Higher Secondary Certificate (12th)

Dominic Savio Hr. Sec. School, Chetpet - 2016
